

Himma is an AI-powered hiring platform that automates first-round interviews through live voice conversations.

Himma Interview Platform — Architecture

Snapshot 2026-09-11 · 3 services · 1 Postgres · 1 Supabase Auth tenant

It gives every candidate a consistent interview experience, generates structured assessments and scorecards, and helps HR compare candidates fairly.

AI conducts the interview. Humans make the final hiring decision.

Himma — How It Works

One role. Every candidate gets the same live interview. Every decision stays human.

The value flow

One role → many candidates → consistent interviews → informed human decisions

Consistency and fairness, at any scale.
